The 30-Book Roadmap

Thirty Memory Escape Books to build, in an order that starts on the proven shelves and widens from there. Every row is a set of dials you can turn in Clueboo today.

A roadmap, not a forecast. It tells you what to build next so you never stare at an empty screen. It cannot tell you what will sell. Every row uses only what is in Clueboo itself; no upgrade is needed.

How to use it

1. Build one book. Read it. Play it once with a real person.
2. Publish it, then build the next row. Each book takes its own puzzles, questions, page order and cover look.
3. Tick the row. When a row does well for you, build its neighbours: the same storyteller in another way to play, another length, or large print.

Three ways to make a row your own

- **Times of life.** Tick a different six of the twelve on the Book tab and the book tells a different life.
- **The cover.** Shuffle it, or use a recipe from the Cover Recipe Book (bonus 5).
- **A real family.** Any row becomes a one-family book with the Family Interview Sheet (bonus 1).
